

# POST FIRE

## SERVICES.

Enthalpy Analytical is your national network of accredited environmental laboratories designed to provide you, our clients, with responsive turnaround, best-in-class testing support, innovative science, regulatory expertise, and high-quality data.

### Wildfire

---

Wildfires impact not only the immediate area within flame reach but can stretch hundreds of miles as the smoke is carried by the wind currents. Close to the epicenter, safety teams, municipalities, and remediation groups are utilizing our analytical expertise for:

- PAHs
- Metals
- Dioxin and Furans
- Asbestos
- Soot/Char/Ash
- Creosote
- Acids
- PCBs
- Carbon Monoxide
- Pentachlorophenol
- Nitrogen Oxides

### Structure Fire

---

Building remediation crews, insurance companies, and property owners are engaging our laboratories for scope of work planning, clearance testing, and re-occupancy odor/symptom complaints.

- Volatile Organic Compounds
- Metals
- PM2.5 & PM10
- Aldehydes
- Soot/Char/Ash
- Asbestos

### Consultants

---

We specialize in providing governing authorities, business communities, remediation groups and emergency services with consulting services. Helping all to plan practical and attainable recommendations for restoring lives back to normal.

Our professionals have passion for the trade - let us help you on your next project.
